BANK UP CORPORATION PROVIDES CITATION

PAYMENT PROCESSING SOLUTION TO T2 SYSTEMS

Bank Up Corporation is working with T2 Systems, Inc., a national citation processing and collection company, to provide the payment processing component to T2's comprehensive citation processing offerings to a northern California municipality. T2 Systems provides a complete citation management service to assist municipalities to manage and grow citation revenue. T2 provides a professional citation processing turnkey solution that incorporates Bank Up's regional lockbox processing capabilities to provide a safe, secure and cost effective method to process citations.

T2's citation collection technology assists municipalities to grow citation revenue, collect parking debt and provide real-time data access that can be configured to each municipality. Bank Up processes payments collected on behalf of the municipality, making daily electronic deposits to the municipalities' banks. Bank Up creates a daily payment file that is integrated into the T2 unified citation management platform that offers real-time data access. Bank Up'system contains searchable images of all citations and payments processed, which enables T2 collection managers to optimize and significantly increase enforcement revenue, reduce operational costs for the municipalities, and improve customer service.
